

PAC Retreat — Vision Statement Candidates

Transcribed verbatim from flip-chart photos taken at the PAC retreat, 2026-07-28. Source: [pac_retreat_sources/event_artifacts/images/vision_statements/](#) (5 photos, 7 distinct statements). Not yet adjudicated into a single official vision — see [roadmap/open_decisions.md](#) if/when this becomes an open decision item.

VS-1

Tarleton State will thoughtfully integrate AI across learning, work, and institutional operations to improve student success and create lasting value for all stakeholders.

Source: [IMG_20260728_093023.jpg](#)

VS-2

Tarleton State University will leverage AI to accelerate degree completion, streamline university operations, and ensure academic integrity through innovation that prepares students for life-long learning in an AI world.

Source: [IMG_20260728_093023 \(1\).jpg](#)

VS-3

Tarleton State University will harness A.I. to enhance student success, accelerate innovation and empower our stakeholders to thrive in a rapidly evolving world. Through responsible and ethical use, we will amplify human potential, transform lives and inspire future generations to lead, innovate and create lasting value for society.

Source: [IMG_20260728_093023 \(2\).jpg](#) (left poster)

VS-4

"Tarleton State will use AI Technology to transform learning, research, institutional effectiveness, and operational efficiency while preparing every student for an AI-enabled future and maintaining the highest standards of integrity, privacy, and trust."

Source: [IMG_20260728_093023 \(2\).jpg](#) (right poster)

VS-5

We will use AI to improve student success, workforce readiness, academic excellence, research innovation, operational effectiveness, and community impact while protecting academic integrity, privacy, security, access, and human judgement.

Source: [IMG_20260728_093023 \(3\).jpg](#) (left poster)

VS-6

"Tarleton State University will responsibly use AI to prepare every learner and colleague for an AI-enabled future while strengthening student success, trusted data use, institutional effectiveness, and workforce impact."

Source: [IMG_20260728_093023 \(3\).jpg](#) (right poster, titled "Vision Statement"). Original had "with" struck through and replaced with "and colleague".

VS-7

Tarleton State University will harness responsible, human-centered AI to advance research excellence, improve student success, strengthened workforce readiness, and create transformational impact for Texas and beyond!

Related artifact: proposed pillars (not a vision statement)

Found alongside VS-7 on the same photo, titled "PILLARS" — likely a supporting framework rather than a candidate vision statement itself:

- Research Excellence
- Student Retention & Success
- Academic Innovation & AI Literacy
- Workforce & Economic Impact
- Operational Excellence
- Responsible AI Governance

Synopsis across all 7 statements

Despite different wording, the seven statements converge on a shared shape: **Tarleton State will use AI, responsibly, to improve outcomes across learning/academics, workforce readiness, and institutional operations — while protecting trust (integrity, privacy, security).**

Themes present across most statements:

- **Student success** — present in 6 of 7 (VS-1, VS-2, VS-3, VS-5, VS-6, VS-7). The most consistent anchor across every draft.
- **Workforce readiness / development** — present in 5 of 7 (VS-2 via "life-long learning," VS-5, VS-6, VS-7, and implicitly VS-1's "work").
- **Operational effectiveness/efficiency** — present in 5 of 7 (VS-1, VS-2, VS-4, VS-5, VS-6).
- **Responsible/ethical/human-centered use of AI** — present in 5 of 7 (VS-3, VS-4, VS-5, VS-6, VS-7). Framed variously as "responsible and ethical," "human judgement," "human-centered," or a named standard (integrity/privacy/trust).
- **Integrity, privacy, security, or trust** — present in 4 of 7 (VS-2, VS-4, VS-5, VS-6).
- **Research / innovation** — present in 3 of 7 (VS-4, VS-5, VS-7), least consistent of the major themes.

Points of divergence:

- **Scope of "who benefits."** Most versions center students; VS-3 and VS-6 explicitly widen scope to "stakeholders"/"colleague" (staff/faculty, not just students), and VS-7 widens scope geographically ("Texas and beyond").
- **Tone/register.** VS-1, VS-2, VS-5 are plain and operational. VS-3 and VS-7 are more aspirational ("amplify human potential," "transformational impact... beyond!"). VS-4 and VS-6 read as the most formal/policy-like (quoted, standards-oriented).
- **Level of specificity.** VS-5 is the most exhaustive single-sentence list (six outcome areas + five protected values); VS-1 is the most compact.

Working synthesis (not adjudicated):

Tarleton State University will responsibly use AI to improve student success, workforce readiness, and institutional operations, while protecting the integrity, privacy, and trust of our students, faculty, staff, and community.

This synthesis is a starting point for discussion, not a resolved decision — a formal choice among (or synthesis of) these statements should go through the same adjudication path as other framework-level items in roadmap/open_decisions.md.
