

FY25 Strategic Priorities Accomplishments

9 Strategic Priorities

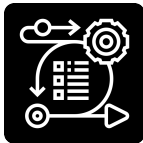

**1. Student and
Learner Success**

**2. Generative AI
Strategy for Scaled
Learning**

**3. Transformation towards
an AI-centric organization**

**4. Alignment and
Agility**

5. Cybersecurity

**6. Social impact and
inclusive excellence**

**7. Data, Analytics, and
Insight**

**8. Technology
enablement and
digital
infrastructure**

**9. Digital
transformation**

1. Student and learner success

1. Student and learner success

Goals

Objective: Accelerate learning solutions and dynamic technologies to empower and enable students and learners to thrive.

Immersive learning

- **Futurescape Career Game** launched on Meta Quest & Chromebooks, engaging 600+ ASU Prep students in partnership with EOSS and ASU Prep. <https://nextlab.asu.edu/futurescape/>
- **Global Launch Fluent Futures Lab** created immersive ESL sessions; 90+ hours of VR learning delivered; showcased at Meta HQ.
- **Digital Twin of AZ Power Grid** presented to the Arizona Corporation Commission, influencing state IRP planning.

Global and strategic partnerships

- **Launch of the Tri-U AI Community of Practice** with the goal of exploring use-inspired practical research that supports teaching and learning systems at scale.
- **Deepened global alliances** (e.g., Universidad Autónoma de Madrid, Universidad Argentina de la Empresa, Tecnológico de Monterrey).
- **Next Lab Tours** hosted 420+ leaders (international, academic, civic, and industry) across 25 innovation showcases.

Goals

1. Student and learner success

Objective and accomplishments: Accelerate learning solutions and dynamic technologies to empower and enable students and learners to thrive.

Creative Fluency and AI advancements

- **AI Creative Learning Labs & Creative Compass AI assistant** piloted to support hands-on creative exploration and to foster innovation.
- **AI-powered microcredentials** via Spark Challenge with a 100+ learners earning verified, skills-based badges in emerging tech.
- **Creative Futures with Adobe** launched campus-wide, enabling 14,000+ Adobe activations and 194 workshop participants.
- **Conducted an IRB-approved longitudinal study** with the Learning Engineering Institute and First-Year Writing Programs, on faculty and student perceptions and practices for adopting AI, self-efficacy for using AI and experiences using AI as a writing companion. Data will be analyzed and published to inform future practice.

1. Student and learner success

Goals

Objective and accomplishments: Accelerate learning solutions and dynamic technologies to empower and enable students and learners to thrive.

Platform and Programs

- **ASU Portfolio** saw the launch of new features including batch enrollment and integrated course details. This new tool has grown to 2,338 unique users and 2,940 active portfolios.
- **Trusted Learner Network** made significant advancements toward a full-scale production launch and advanced partnerships with Work+ and SkillsFWD.
- **Redesigned [ASU Accessibility site](#)** with tailored faculty tools and improved faculty access to remediation resources.
- Delivered **Cloud 101**, an introductory cloud computing course, to Title I high school students (now four consecutive years) in partnership with AWS, Ed Equity Lab, and the W. P. Carey School of Business, expanding early access to high-demand tech skills.
- **Scaling research storytelling** in partnership with SOLUR (School of Life Sciences Undergraduate Research), launched a storytelling program for undergraduate researchers that supports creative formats such as narrative websites, videos, and social media.

2. Generative AI strategy for scaled learning

2. Generative AI strategy for scaled learning

Goals

Objective and accomplishments: Leverage AI and emerging technologies to advance learning at scale.

Personalized learning at scale

- **ASU for Life Learning Pathways:** AI-driven MVP. Canvas integration, content mapping and learner database under development.
- **DegreeMe in collaboration with EdPlus:** Now live with 12,700+ users and a 5% conversion rate. Transitioned to the CreateAI platform, which is foundational to the learner agency roadmap.

Enterprise AI platforms

- **CreateAI Platform:** Scaled to 1,500+ faculty/staff. Major upgrades: voice, OCR, vector search, document analysis. Canvas/Identity integrations are underway.
- **CreateAI Toolkit:** Enhanced ASUGPT and MyAI Builder for non-technical users. Full rollout to all faculty and staff planned for fall of 2025. Coordination with Learning Experience is already in motion to ensure effective training and adoption across the university.
- **Ethical AI Engine:** API for bias and accuracy analysis launched. The toolkit supports transparent design and experimentation.

2. Generative AI strategy for scaled learning

Goals

Objective and accomplishments: Leverage AI and emerging technologies to advance learning at scale.

Instructional transformation

- **Faculty and EdPlus collaboration:** Language Buddy (Spanish) and AI course assistant launched. IDNM Toolkit generated 20,000+ questions; 6,600+ unique site visitors.
- **Dreamscape Learn:** Multi-agent AI tutoring assistant built into Canvas. Key features include quiz-aware controls and academic integrity safeguards. Beta release: Summer B.

Innovation Challenges

- **AI Innovation Challenge:** 182 projects, 1,600+ licenses, 1,000+ users. Notable use cases in nuclear research and pedagogy. Scaling support strategy in motion.
- **Next Lab + Mayo Clinic:** VR stroke assessment simulation in active development. Built by students; designed for scalable, modular training. Mayo is providing clinical oversight.
- **SolarSPELL Collaboration:** Offline AI agents created for remote learning. Student-built using open-source Llama models.
- **AI Cloud Innovation Center (AI-CIC):** Hosted at ASU in collaboration with AWS, the AI-CIC tackled real-world challenges with public sector partners, launching 50+ projects that delivered actionable prototypes and AI-driven solutions.
- **EdgeAI Showcased at Meta LlamaCon & ASU+GSV:** Demonstrated relevance for disconnected and low-power environments.

2. Generative AI strategy for scaled learning

Goals

Objective and accomplishments: Leverage AI and emerging technologies to advance learning at scale.

AI in Teaching and learning

- **Syllabot AI chatbot** supported 2,300+ student inquiries in its pilot course, reducing instructional friction.
- **Syllabus Helper AI Tool** was developed for faculty; beta testing is set for June 2025 to streamline policy-aligned syllabus creation.
- **AI x Human Teams in assessment pilot.** Launched a research study in partnership with Professor Lance Gharavi, backed by the Learning Engineering Institute, to assess AI-assisted feedback in large courses

3. Transformation towards an AI-centric organization

3. Transformation towards an AI-centric organization

Goals

Objective and accomplishments: Cultivate and advance an appreciative, inclusive, and AI-forward culture to enhance the employee experience and support ongoing professional growth, aligning with ASU's Charter and Design Aspirations.

AI Readiness

- **Upskilling:** Engineering leveraged Pluralsight to create tailored learning pathways and upskilling opportunities for team members with an increased focus on AI development.
- **AI Adoption:** More than half of the senior management team have implemented generative AI within their organization to provide team members with rapid access to information for increased operational efficiency and productivity.
- **Digital workforce:** Elevated the importance of developing a framework for a digital workforce. Provided evidence of how AI-centric efforts yield value including efficiency as shown by the Financial Aid and Concierge Bot.
- **Organizational Change Management:** Held sessions with front-line staff in the Experience Center in preparation of working with and alongside more advanced digital assistants and agentic AI.
- **Talent Management:** Job descriptions for new and replacement roles enhanced to include expectations of AI experience or willingness to learn and adopt AI as a way of working.

3. Transformation towards an AI-centric organization

Goals

Objective and accomplishments: Cultivate and advance an appreciative, inclusive, and AI-forward culture to enhance the employee experience and support ongoing professional growth, aligning with ASU's Charter and Design Aspirations.

AI Innovation Challenges

- **Spring 2025:** 64 projects approved; 860 ChatGPT licenses distributed.
- **Summer 2025:** 84 projects approved; 1,010 licenses being provisioned.
- **API Innovation:** Infrastructure completed to support custom tool development via API access.

Enterprise AI Enablement

- **Enterprise AI Tools:** Launched Fall 2024; secure access to Gemini, Copilot, ChatGPT, CreateAI and MyAI Builder.
- **Governance and training:** Embedded workflow approvals and partnered with TSS for Fall 2025 readiness.

AI Infrastructure and resources

- **CreateAI Lab:** 1,500+ Slack members; weekly workshops with 30 average attendees.
- **ai.asu.edu Enhancements:** Now the central hub for tools, updates, and ASU's AI Journey.
- **AI Transcription Tool:** Migrated to AWS; Slack-integrated; full ASU launch planned for Fall 2025.

4. Alignment and agility

4. Alignment and agility

Goals

Objective and accomplishments: Advance operational alignment and ensure strategic execution through maturation of how we identify, define, prioritize and deliver work with directives from the President's Office, Office of the Chief Operating Officer and the ASU Enterprises.

University Technology Priorities

- **ASU Enterprise Research Isolated Environments (ERIE)** launched and enables secure peer-to-peer and/or wireless lab instances for the research community. The first ERIE network went live for production use in June 2025.
- **Consent Management Initiative** completed with implementation of enterprise-wide tooling to manage cookie consent required by GDPR and 17 other countries with similar laws.
- **Enterprise deployment of data-driven Siteimprove** for quality assurance of websites, monitoring of web accessibility, and Search Engine Optimization.
- **Advanced Modern Network & Remote Access** with 90% of non-FedRAMP KE websites migrated to Cloudflare. Exploring Cloudflare FedRAMP compliance and evaluating Arista MSS to potentially replace traditional firewalls.

4. Alignment and agility

Goals

Objective and accomplishments: Advance operational alignment and ensure strategic execution through maturation of how we identify, define, prioritize and deliver work with directives from the President's Office, Office of the Chief Operating Officer and the ASU Enterprises.

Workforce Development

- **SME AI Fellowship Program:** A 6-month pilot was completed; business units were equipped to apply AI, and now, they are scaling as an enterprise model.
- **Deque University Training Strengthens Accessibility Expertise:** The User Experience and Accessibility team completed over 50 hours of Deque University training, including 44+ courses. A standout tool was Deque's AI chat assistant, which offered expert answers to niche accessibility questions.

Workday - A Modern HCM Platform

- **Launched on December 23, 2024:** First pay period successfully dispatched 22,814 payslips.
 - **Replaced Systems:** BrassRing, Career EDGE, EDGE Conversations, PeopleSoft HCM, SubItUp, Time and Attendance Support
 - **Remediation:** Provided strategic direction for legacy system remediation and collaborated with the Technical PM to engage Product Team PMs and secure resources needed to meet remediation development requirements.
 - **Batch Jobs Transitioned:** Successfully transitioned HR processing from PeopleSoft to Workday by updating, adding, and retiring batch jobs. Approximately 20% of all daily and weekly jobs were modified as part of this effort. The transition was completed on schedule in January, and ASU is now operational on Workday.

5. Cybersecurity

5. Cybersecurity

Goals

Objective and accomplishments: Elevate cybersecurity posture and ensure a safe, trusted and secure digital ecosystem.

Cyber Risk Management

- **Information Security Advisory Group:** ISAG, led by the Chief Information Security Officer, has representation from all major areas across the university. This working group has been established to ensure security programs meets the needs of the enterprise and departments.
- **Streamlined Vendor Risk Management:** Leveraged enterprise tools to create and manage a vetted vendor list, automated vendor risk scoring. Enhanced process includes integration of regulated data considered during vendor risk assessment.
- **Cyber Risk Register:** Leveraged enterprise tools to implement a Cyber Risk Register enabling more effective cybersecurity risk management. Successfully piloted with key stakeholders. The full launch is planned for early FY26.

Operations

- **AI-ready Security Operations:** Selected and began implementation of Google SecOps. This strategic move integrates advanced AI/ML capabilities for enhanced threat detection, automated response and improved visibility across ASU's digital ecosystem.
- **Data-informed Security Operations:** Published metrics and analytics that provide visibility into incident trends and response times for actioning by security leadership.

5. Cybersecurity

Goals

Objective and accomplishments: Elevate cybersecurity posture and ensure a safe, trusted and secure digital ecosystem.

- **Endpoint Management Modernized:** Launched new enterprise-grade configuration and policy management capabilities, reducing risk, enhancing compliance, and enabling scalable, secure support for hybrid work and research.

Vulnerability Management (VM)

- **Significant Progress on Operational Risk Reduction:** Began enforcement of network isolation for unaddressed exploitable vulnerabilities on IT systems across the enterprise. Immediate improvements realized in addressing open vulnerability backlogs.

Security Awareness

- **Revamped Security Awareness Training:** Implemented a new training process that includes tiered communication for increased compliance along with a “test out” option. This new process is supported with new custom cybersecurity training materials including AI-centric topics.
- **National Cybersecurity Awareness Month:** Enthusiastic participation with five weeks of targeted training sessions. Events reached a broad audience and showcased insights from 10 distinguished speakers across academia and the private sector. Participation included Tri-University colleagues along with Harvard Business School, Louisiana State University and corporate partner Charles Schwab.

6. Social impact and inclusive excellence

6. Social impact and inclusive excellence

Goals

Objective and accomplishments: Advance communities we serve through strategic partnerships, digital inclusion and technological innovation. Our commitment to fostering inclusive environments and empowering communities enables us to deliver on ASU's Charter.

Advancing Broadband Access and Digital Inclusion Across Arizona

- In under a year, the **AZ-1 web portal launched** a LinkedIn presence with 540+ followers and shared updates on broadband partnerships, mapping tools, and digital equity efforts. ASU's Maricopa County Broadband Initiative (MCBI) earned national acclaim with a Sustainable IT Impact Award and finalist recognition in the global Esri StoryMap Competition for its student storytelling work. Dozens of original stories and community partnerships have emerged, with the AZ-1 portal now featuring student-created art and narratives.
- ASU formed a **broadband mapping coalition** with key state partners to align GIS practices and improve statewide data visualizations. Through MCBI and the Hive network, the Institute for Digital Inclusion Acceleration (IDIA) connected 6,522 residents to reliable internet, trained over 7,100 people in person, reached 75,908 through outreach, and distributed 8,334 devices. IDIA's efforts, including a telehealth program for rural youth and seniors, have been recognized by the CDC as an exemplar model and were named a finalist for an IDC award.

6. Social impact and inclusive excellence

Goals

Digital Twins and Civic Tech

- **Arizona Transmission Grid Twin:** Developed by Next Lab; adopted as IRP planning model by the Arizona Corporation Commission.
- **City of Surprise Partnership:** Downtown digital twin used in smart development plans; showcased at **Transforming Local Government Summit**.
- **Cultural & Civic Twins:** Next Lab worked closely with the City of Surprise to model emerging downtowns using digital twins to support smart development and retail/entertainment investment. These efforts were showcased at the Transforming Local Government Summit and featured in public-private planning discussions.

Spark Challenges: AI, Equity and Student Innovation

- **Zoom Campus Impact Challenge:** Co-created AI tools for academic success, Deaf accessibility, and student engagement. Strong industry mentorship from Zoom.
- **CodeFlow Challenge with TIAA:** Developed practical AI solutions bridging classroom and industry needs; emphasized inclusivity and real-world skill-building.
- **UX Spark Challenge:** Co-designed digital wallet, skills mapping, and verifiable credential tools, linking lifelong learning to tech fluency.

6. Social impact and inclusive excellence

Goals

Student-Led Tech for Social Impact

- **Mental Health Challenge:** Addressing the critical issue of mental health, this challenge fostered the creation of AI tools designed to support emotional well-being. The initiative demonstrated how digital transformation can be harnessed to address personal and community health challenges, aligning with ASU's commitment to innovation and student support.
- **Sustainable AZ Challenge:** 100 students developed AI solutions for mining sustainability; \$15K in scholarships awarded.
- **Learning Enterprise - Agentic AI Challenge:** Explored next-gen agentic systems to support learning and operations; emphasized experimentation at scale.
- **Endstar Game Maker Challenge:** The Endstar Game Maker Spark Challenge sparked cross-disciplinary collaboration among ASU students, many of whom were new to coding and game development. By leveraging partnerships with the MIX Center, Endless Studios, E-Line Media, and AME faculty, the event transformed university resources into a hands-on creative tech experience.

6. Social impact and inclusive excellence

Goals

Global Reach and Recognition

- **QS ImpACT Challenge:** 210 teams from 46 countries. ASU leaders shaped and hosted the 2024-25 editions. The event strengthened ASU's global position in tech-for-good education and equity.
- **Mastercard Foundation:** Welcomed five students from Africa as part of the inaugural AI graduate program, expanding digital skills and career pathways through hands-on work with ET team.

Organizational culture and leadership Initiatives

- **Intentional Culture Building:** 79% survey response rate; Collaboration Corp continued with active cross-functional engagement with 28 members representing all areas of Enterprise Technology.
- **Published:** 2024 Year in Review alongside ASU's AI Journey 1,2, and 3 editions of By the Numbers. These magazines showcase Enterprise Technology's progress, impact and evolving opportunities across our AI initiatives and enterprise achievements last fiscal year.

Community and recognition

- **Volunteerism:** 133 staff logged volunteer hours participating in service events during Season of Giving (November) and National Volunteer Month (April); 231 staff pledged to United Way
- **Awards:** Creative x Communications won five Copper Anvil Awards being recognized by Public Relations Society of America for strategic communication and media excellence
- **LinkedIn Reach:** Surpassed 10K followers.

7. Data, analytics and insight

7. Data, analytics and insight

Goals

Objective and accomplishments: Advanced enterprise-wide data maturity to drive data-informed outcomes.

Enterprise Systems Integration

- **Workday HCM Support:** Provided strong data support to finalize the **decommissioning of PeopleSoft HR**.
- **SnapLogic ETL Implementation:** Fully functional. Ended contract for previous ETL software vendor. Adding opportunities to leverage new Snaplogic tool in other areas at no incremental cost
- **Real-Time Data Sources:** Select feeds now arriving **hourly or faster**. New methods are being applied to Workday HCM data ingestion.

Prototyping and experimentation

- **MyAI Builder for Data Support:** Prototyped for customer service; shelved due to limited impact vs. cost.
- **Natural Language Query (NLQ):** Two proof of concepts (internal and external) completed. Valuable learnings but not viable. Engaging **AWS for expert support** on next iteration.

8. Technology enablement and digital infrastructure

8. Technology enablement and digital infrastructure

Goals

Objective and accomplishments: Ensure ASU has a reliable, future-ready digital environment.

Network and Access Modernization

- **Analog Phone and IPTV migration:** Completed 32 building migrations and all IPTV drops.
- **Network port upgrades:** 42% completion projected by end of FY25.
- **Guest WiFi Overhaul:** POC launched at USB with Cloudflare FWaaS. Multi-stage rollout plan underway; circuit upgrades and Cloudflare stability needed for expansion.

Cloud Management

- **Morpheus Cloud Management:** Platform installed to enable self-service provisioning. AWS integrated; Azure and GCP slated for FY26. Team training complete.

Emergency Change Automation

- **eCAB Process Overhaul:** Replaced manual, 24/7 Slack monitoring with an automated PagerDuty escalation workflow. Reduced team burden and ensures timely emergency change responses, increased scalability, and work-life balance.

Nagios Platform Enhancements

- Integrated 20+ UPS systems for power monitoring. Enabled real-time visibility into network, power, temperature, and battery status. Enhanced vendor compatibility using MIB files; performance graphs now generated automatically.

8. Technology enablement and digital infrastructure

Goals

Objective and accomplishments: Ensure ASU has a reliable, future-ready digital environment.

IPTV

- **Partnered with Cox Communications to launch IPTV** across campus starting July 2025, replacing the current Apogee service. This upgrade eliminates coaxial cables, cuts costs by over 50%, and modernizes TV delivery through Ethernet or wireless.
- **Network implementation is underway:** Communications to cost centers have begun and are ongoing. Cox is coordinating account setup and installation scheduling with each cost center.

Identity and access management

- **Identity Resolver:** Delivered Version 2 adding automated front-end testing and enhanced API support for employee affiliation grants and Workday integration. Advanced ASU Access resolution logic and improved data quality.
- **Enterprise Identity Cloud:** Completed Release 2 migration to AWS Neptune, boosting scalability and security. Refined event flows and authorization models to support Universal Profile data requests.
- **Universal Profile:** Launched prototype 7 weeks early. Built identity event ingestion framework and began onboarding Learning Enterprise. Advanced mock data testing and aligned multi-stakeholder architecture and data flow.

8. Technology enablement and digital infrastructure

Goals

Objective and accomplishments: Ensure ASU has a reliable, future-ready digital environment.

Identity and access management continued

- **Enterprise Authentication Single sign-on:** Delivered core auth services such as email/password, social login and service tickets. Enabled Central Authentication Service compatibility and context-aware IdP selection. Iterated on UI/UX design with mockups and flows.
- **Anomaly Detection and Data Quality:** Integrated detection tools on core servers; partnered with EdPlus to model identity risks. Initiated synthetic data research and resolved key ASU Access data quality issues.

New Admissions App

- **Successful Full Migration:** All undergraduate and non-degree student populations transitioned from legacy application to New Admissions App. Strong partnership between Admissions, Enterprise Technology, and EdPlus teams to ensure alignment, quality, and continuity.
- **Improved Student Experience:** More standardized, data-rich application with better UI/UX and fewer errors and points of friction.

9. Digital Transformation

9. Digital Transformation

Goals

Objective and accomplishments: Enhance faculty and staff success through unified and optimized technology experiences.

Exploration and Pilot of Agentic AI

- **Pilot of agentic AI** to answer questions about parking and transportation with automatic case creation for the Experience Center when human assistance is needed. Deflection rate is approximately 81%.
- **Proofs of concepts completed for EdPlus and Sandra Day O'Connor College of Law** with results indicating potential for significant efficiency gain and improved staff and student experiences.
- **Advancing ASU's Digital Agenda workshops** held with university-wide participation identifying 30+ use cases for broad adoption of agentic AI.

Concierge and chatbot programs

- **Enrollment Center Concierge:** Relaunched via secure CreateAI API; now used by 50+ coaches with real-time data.
- **Experience Center Concierge (Phase 2):** Live beta used during Spring Rush.
- **HRBot:** In collaboration with Business & Finance, shifted to Workday-native chatbot for deeper integration.

9. Digital Transformation

Goals

Objective and accomplishments: Enhance faculty and staff success through unified and optimized technology experiences.

Document Intelligence & Automation

- **Document OCR:** Enabled Business & Finance to use advanced OCR via a custom API on CreateAI, integrated with Microsoft Copilot Studio and PowerAutomate. Provided AI guidance, supported procurement and security, and BFIT continues to refine automation efforts. The OCR API will now be available to all ASU teams on CreateAI, with ongoing upgrades as new solutions emerge.

My Attestations Launched

- **Data Access Process Standardized:** As part of ET's GLBA audit response, the ServiceNow Team worked with the Data & Analysis core to design a standard process for conducting data access reviews for the Data Warehouse, Operational Data Store, and Analytics User Database.
- **Portal Created:** The “My Attestations” portal enables managers to review, retain, or remove data access roles for their staff, ensuring auditable access. Once an attestation is completed and submitted, responses are uploaded and returned to the Data Warehouse to close the loop.
