AI Fundamentals Certificate

University-wide and open to all students, regardless of major

AI for Everyone, Everywhere

UF integrates AI into education, research and industry collaborations across all disciplines, from healthcare to agriculture and aerospace to the arts. We enhance teaching, drive discovery, and boost efficiency. Start big or start small. Just start.

Pioneering a Comprehensive Approach to AI Education

Suddenly, AI seems to be everywhere in our lives, and in our work. Our job is to prepare students for this reality, even as it evolves.

Scientists and scholars have been using machine learning, deep learning, and other forms of artificial intelligence for decades. Yet in higher education, AI remained specialized. The University of Florida has pioneered the effort to integrate AI education in every major and every college. [AI Across the Curriculum](#) is our initiative and our ethos.

An Initiative Beyond One University

As proud as we are of our efforts, we are just beginning. We hope that what we have learned about building a comprehensive approach to AI education can serve as the foundation for other universities. As we build on each other's work, we strengthen higher education and empower our graduates.

AI to Serve Human Needs

AI is rapidly transforming the economy, from engineering to business to education, agriculture, and the arts. This takes shape as personalized medicine, harvesting robots, self-driving cars, and much more. UF's university-wide initiative seeks to infuse AI into education and research across the natural sciences, social sciences, and humanities. We want to expand human-centered design so that AI serves humanity and the planet.

"Universities need to get ahead of the curve as artificial intelligence reshapes industries from engineering to the arts. How can they infuse AI into their curricula in a way that will be useful to students today and in five years? The answer lies in embracing a diversity of AI technologies across different disciplines, setting ambitious goals, and building in adaptability to change." —Joe Glover, Interim Provost, University of Florida

Hybrid Intelligences: Creative Leadership in the Era of AI

In these standalone, workshop-based sessions, participants will experience diverse perspectives and activities on...

Organized into three tracks, each session will focus on a specific theme. Participants may attend sessions in any combination. Those who complete a full "track" will earn a free Digital Badge micro-credential!

Track 1 | Embodiment, Memory and AI

Mondays, July 13, 20 & 27 (12:30 - 3:15pm)

Explore embodiment and emerging technologies through architecture, movement and memory

Track 2 | FUTURES LAB: Speculation, Prototyping & Possible Worlds

Wednesdays, July 15, 22 & 29 (5:30 - 7:30pm)

Use dance, music and visual arts to imagine the year 3000

Track 3 | Ethics and Embodied Creative Leadership

Thursdays, July 16, 23 & 30 (12:30 - 3:15pm)

Become a leader through ethical inquiry, critical reflection and physical practice

Open to UF students from all disciplines, faculty, and the general Gainesville community. All are welcome!

The program is free but advance registration is required.
